

# ART311: FINAL PROJECT

## Interactive Project

**Group Project:** Recall

**Group Members:** Tina Huynh, Alejandro Garcia, Rageeb Ashekin

**Link to Project:** <https://tee-huynh.github.io/art-311/>

### Some Important Notes:

- Have volume turned on
- Images and text is not perfectly formatted for all computer monitor and laptop screen sizes, therefore, some text may be out of place or hard to read – please resize the window accordingly if you encounter that issue
- Some pages have hidden interactions, try to find them 😊
  - However, another note: they may be very off centered from the actual object you're interacting with depending on your monitor size, so please play around with the area and background in its entirety!
  - Since this is only a prototype and there was limited time, we were unable to figure out how to make this perfect for all computer screens.
- Thanks for the great semester!
